

SolleClear SI™

Clear head...Clear path in Life!

Life's a competition. It's an on-going battle between physical and emotional contestants vying for what we each can offer; our time and attention, our energy, and even our commitment and affection. But, to really be able to give our best each day, we have to feel our best. And nowadays that's easier said than done. Feeling our best requires the unobstructed functioning of our primary body systems: clear respiration, strong circulation, resistance to unfriendly microbes, and clear vision.

When either our effort or our outlook gets a little stagnant, targeted nutrition can restore flow and balance. In addition, restoring full functionality by clearing systems pathways directly affects our mental outlook. Clear body systems...clear mind. Clear mind...clear path forward in life. Thankfully, this kind of critical, targeted nutrition is available in SolleClear SI. With pure plant ingredients for greater overall clarity and enhanced immunity, SolleClear SI is the ideal daily nutritional boost for even the most challenging path in life.

Ingredients

Sinus Immune Proprietary Blend

Suma Root 10:1 Extract is a powerful adaptogen designed to help strengthen the body and mind against stress, and is a powerful immune system booster. Suma is also used effectively to help increase physical strength, energy and stamina, as well as promote hormone balancing, and strengthen the adrenal glands.

Horseradish Root promotes many health benefits mainly attributed to its high nutrient and mineral content. Traditionally used to help clear issues with sinus, lung, cough and asthma, horseradish also helps line and protect the intestinal tract to help support the digestive system and the body's ability to manage inflammation.

Wasabi Root Extract not only has a powerful taste, but also powerful effects on overall health! This very potent plant contains a wealth of antioxidants to help boost the immune system, support the respiratory system, and can aid in removing harmful toxins from the body.

SolleClear™ Proprietary Blend

Bilberry and Eyebright - to help clarify the eyes and mind,
Fennel, Mullein and Fenugreek - to help clarify the sinus and respiratory system,

Butcher's Broom, Celery, and Quercetin to help clarify the blood and circulatory system.

These proven herbal ingredients support the body's ability to clarify the mind, eyes, and blood, as well as the entire respiratory system. The SolleClear™ blend emphasis on respiratory and circulatory herbs reflects the Solle philosophy of the critical function of these systems in mind/body health at the cellular level.

The Solle Difference

The SolleClear SI formula takes immune system support to a completely different level. Most immune support products only focus on "stimulating" the immune system. SolleClear SI is designed as a complete formula to help the body "strengthen" the immune system by clarifying the mind, eyes, sinus, respiratory and circulatory systems, as well as helping balance hormones during times of physical and mental stress.

5 Key benefits for SolleClear SI®

Immune: Stimulates and strengthens immune system.

Respiratory: Beneficial for those that struggle with sinus and respiratory issues.

Stress: Contains Suma Root which is a powerful adaptogen that strengthens the body and mind against stress.

Clarify: Contains the SolleClear Proprietary Blend which has proven herbs that help to clarify the mind, eyes, blood, circulatory and respiratory systems.

Hormones: Helps the body balance and clarify hormones.

Product Use
